

VEGA DAILY

Vitamins to VEGA !

2nd. Jan. 2024

VITAMIN

01

The vitamin market has not changed much this week and is mainly stable. As foreign countries enter the holiday season, there are fewer export inquiries. The supply of VB1, VK3, VC, etc. is tight; the transaction volume of VE increased slightly this week; VA, calcium pantothenate, folic acid, VB12, etc. are still hovering at the bottom.

AMINO ACID

02

The overall market price of small varieties of amino acids this week is mainly stable. Valine:the price of is stable and slightly decreased.The market transactions are average. Tryptophan, the market delivery is tight, and the price is at a high level. Customers purchase on demand, and end-users' mood for purchasing goods is slightly lower.

API

03

The veterinary drug raw material market is operating smoothly this week, and the overall market demand is average. Products such as doxycycline, florfenicol, OTC and amoxicillin remained stable, the market prices of tylosin and albendazole were weak, and the prices of lincomycin and levamisole hydrochloride remained strong.

FOOD ADDITIVE

04

The price of creatine monohydrate remained stable this week, and there will be a price reduction trend in the next two months; The price of L-carnitine series products expected that the price will rise in the future; The preservative product sodium benzoate/potassium sorbate series products are affected by market demand , the price remains stable, and we will continue to pay attention to the shipments of each factory in the future.
