Vitamins to VEGA!

12th. Jan. 2024

## VITAMIN

01

Beginning this week, vitamin E feed grade 50%, manufacturers received a certain amount of orders under USD7.5/KG price and the export market transaction price has been basically USD7.2/KG, some transactions reached USD7.5/KG.

## AMINO ACID

02

Valine: The recent quotation of domestic manufacturers continues to be weak, the price of some manufacturers is slightly lower, the trade market quotation is about USD2.25/KG. The end customer is less likely to sign the order, it is expected that the market is weak in the later period, pay attention to the factory order.

## API

03

According to Wuxi Apptec official micro news, on January 8, 2024, Wuxi Apptec announced that its peptide production workshops located in Changzhou and Taixing, Jiangsu Province, were officially put into operation, and the total volume of peptide solid phase synthesis reactor was increased to 32000L, to better meet the growing capacity demand of global partners in peptide drug development.

## FOOD ADDITIVE

04

Recently, affected by market demand, the price of food sweetener sucralose has remained stable, and the market transaction price has stabilized to USD17-17.5/KG. In the short term, the price will not change much in the future, and the market inventory is currently sufficient, and we will continue to pay attention to market changes.
