Vitamins to VEGA!

17th. Jan 2024

VITAMIN| *Vitamin E*

01

Since Tuesday, the overseas market vitamin E 50% feed grade began to lead the rise, up to now, the domestic export transaction price exceeded USD7.5/KG, the local spot price in Europe rose to 8 euros/KG, the North American market is out of stock; In addition, according to domestic manufacturers, the next export quotation will be increased to more than USD8/KG and limited signing orders.

AMINO ACID| *Threonine*

02

The recent domestic factory foreign quotation is weak adjustment, there are mainstream factories using match sales, the export price is between USD1.32-1.34/KG, the end user purchases on demand, the overall market turnover is general, it is expected that the market will be weak in the later period.

API| *Oxytetracycline*

03

For oxytetracycline, oxytetracycline hydrochloride, the market is low and stable, and the factory price continues to fall in last year. Oxytetracycline, the current market price is about USD8.72/KG; Oxytetracycline hydrochloride, the market price USD10.8/KG, the recent market pattern is low and stable, and the subsequent need to continue to pay attention to the adjustment of factory quotes and market demand changes.

FOOD ADDITIVE

04

Recently, the price of sodium benzoate, a food additive used for corrosion protection, has been stable, and the transaction price in the export market is about USD1-1.3/KG. Subsequent forecasts run smoothly.
