VITAMIN

01

Choline chloride: In terms of raw materials, trimethylamine has been slightly increased and is currently stable; ethylene oxide has maintained stable operation after the market rose. The price of choline chloride 60% powder is FOB USD0.6-0.62/KG and is expected to remain stable in the short term, and the main focus will be on the raw material situation in the future.

AMINO ACID

02

Evonik's DL-Methionine production base upgrade project in Singapore is progressing as planned. After completing a two-month shutdown in the fourth quarter of 2023, the methionine production line at the Jurong Island base in Singapore is operating at full capacity again in the second quarter of 2024. Another methionine production plant will also be shut down for upgrades. The upgrade work is to ensure long-term and sustainable global market supply of methionine.

API

03

Northeast Pharmaceutical announced on January 28 that the company's product, the raw material drug L-carnitine, "recently received the European Pharmacopoeia suitability certificate for the raw material drug issued by the European Medicines Quality Administration. The drug is used to prevent and treat L-carnitine deficiency. Northeast Pharmaceutical is It is the second domestic levocarnitine API manufacturer to obtain a CEP certificate. This CEP registration is also the first high-end EU registration for this product of the company.

FOOD ADDITIVE

04

It is reported that Huayuan Biological's annual output of 10,000 tons of high-end microbial polysaccharide project has a total investment of 500 million yuan, covering an area of 106 acres, and uses high-end microorganisms to ferment and produce polysaccharide products. Products are widely used in food processing, biomedicine and other fields.
