VITAMIN

01

Recently, Jiangxi Tianxin Pharmaceutical's annual production capacity of 700MT of VA derivatives and 6MT of 25-hydroxy VD3 project was announced for the first time in environmental impact assessment. The project will build a new 700-ton VA derivatives production line and supporting facilities with an annual output of 200MT of B-carotene, 200MT of canthoracin, 100MT of astaxanthin, 200MT of VA palmitate, and a new 6MT 25-hydroxy vitamin D3 production line. and supporting facilities.

AMINO ACID

02

Recently, the 2024 DSM-Firmich China Sustainable Development Forum organized by DSM was successfully held in Shanghai. With the theme of "ESG, corporate sustainability and sustainable industry chain development", the forum explores the green transformation path of the industrial value chain in the fields of nutrition, health and beauty in the context of the global response to climate change.

API

03

The price of lincomycin hcl has been rising steadily. Affected by the tight delivery and suspension of quotations from some factories, the overall transaction is relatively active. It is expected that the price will remain strong or rise slightly in the first quarter of 2024.

FOOD ADDITIVE

04

Affected by market demand, the transaction price of saccharin sodium is stable at around USD4.7-5/KG. The price of saccharin sodium will stabilize in the short term in the future.
