VITAMIN

01

Recently, the Indian Ministry of Commerce and Industry issued a notice that: with the significant increase in the sales of products imported from China and the continuous decline in prices, coupled with dumping from other countries, which has caused serious injury to India's domestic industry, the applicant intends to re-submit the application to seek remedies for the maximum extent of dumping and damage. In view of this, the Indian Ministry of Commerce and Industry has decided to terminate anti-dumping investigations against Vitamin-A Palmitate originating in or imported from China, the EU and Switzerland.

AMINO ACID

02

Threonine: At present, the quotation of Chinese domestic factories continues the trend before the holiday, the market turnover is not much, the trade market quotation is stable, most factories are mainly to consume inventory, and the demand of end users is still weak.

API

03

Recently, the Tianjin Institute of Industrial Biotechnology of the Chinese Academy of Sciences has made progress in the study of enzyme-catalyzed C-H bond activation. Based on the previous studies on the activation and transformation of different types of C-H bonds catalyzed by enzymes, the selective hydroxylation of C-H bonds of cyclic ether molecules was achieved in pure organic phase by using fungus-derived peroxygenase as catalyst, and optically pure chiral hemiacetal compounds were synthesized.

FOOD ADDITIVE

04

Recently, the food additive xanthan gum was affected by market demand, and the market transaction price was about USD2.8/KG. Prices near the bottom, there's great possibility of subsequent price increases.
