VITAMIN

01

Recently, Hubei Guangji Pharmaceutical Co., Ltd. applied for a patent called "a preparation method of 80% feed grade riboflavin". The invention aims to provide a method for preparing 80% feed-grade riboflavin by spherical crystallization of riboflavin. The obtained 80% feed-grade riboflavin has high density and small particles, and the preparation of the riboflavin with a content greater than 98% solves the problem that the composition of the existing 80% feed-grade riboflavin product is unclear.

AMINO ACID

02

Evonik announced a 10% increase in the global price of DL-methionine 99%, feed grade, effective immediately. All existing contracts and supply agreements will be respected.

API

03

On February 20, NHU issue an official micro announcement, Xinhe Chengcheng API product ibuprofen obtained the CEP certificate issued by EDQM (number: No. CEP 2022-354-Rev 00), the competitiveness of the company's API products has achieved a new breakthrough.

FOOD ADDITIVE

04

Later, affected by market demand, the price of sucralose, a food sweetener, fell slightly, and the current market price stabilized to USD15.5-16 /KG. In the short term, the price will not change much in the future, and the market inventory is currently sufficient, and we will continue to pay attention to market changes.
