

VEGA DAILY

Vitamins to VEGA!

28th. Feb. 2024

VITAMIN | Vitamin C&K3

01

According to market news, since February 27, the mainstream domestic vitamin C manufacturers have stopped quoting external prices.

It is understood that due to the tight supply of raw materials and rising impact, brother technology vitamin K3 MSB96 quoted USD13/kg, MNB96 quoted USD14.3/kg.

AMINO ACID | Lysine

02

On February 27, 2024, according to the latest offer of Chengfu Group: 70% lysine offer is increased, the specific transaction is based on the transport distance, and the priority is to supply long-term stable customers. Recently, the 70% lysine market is relatively stable, but 98% of the factory quotations are raised, and the follow-up attention is paid to the signing volume of 70% of the factories.

API | Doxycycline

03

Doxycycline hydrochloride, the mainstream manufacturers offer firm, but the downstream trading market supply and brand are increasing, the price is declining, the current market price is near USD41.2/KG, please pay attention to the follow-up price trend.

FOOD ADDITIVE

04

Recently, the nutritional additive creatine monohydrate mainstream factory has been to late March to April, the domestic market transaction price is about USD6.9-7.1/KG, the current mainstream manufacturer prices remain stable, the future price is expected to maintain stable in the short term.
