Vitamins to VEGA!

29th. Feb. 2024

## **VITAMIN** | Vitamin E 50%

01

From February 27, ZMC, NHU, Jilin Beisha, DSM and other manufacturers have raised the domestic price of feed grade VE 50% to USD9-9.35/KG, the signing price is also above USD8.7/KG, the domestic market inquiry has increased, and the transaction price has also risen, the North American market has become weak and stable, and the European market has continued to strengthen.

## **AMINO ACID** | Tryptophan

02

The recent quotation of domestic manufacturers is stable, due to the early signing order is much, the current factory is mainly delivered, the domestic trade market price is between USD9-9.35/KG, the price is at a high level, the end user is cautious to sign the order, a small amount of goods, it is expected that the tryptophan market is stable in the later stage.

## **API** | Enrofloxacin/Ciprofloxacin

03

For Enrofloxacin, the recent quotation of domestic mainstream factories is stable, and the export quotation of Enrofloxacin above the tonnage level is stable at USD22.7-23/KG.

Ciprofloxacin hydrochloride market price is USD21.2-21.8/KG. Enrofloxacin and Ciprofloxacin HCL market demand is weak at present, it is predicted that the subsequent price will decline slightly, and continue to pay attention to market transactions.

## **FOOD ADDITIVE** | Aspartame

04

Recently, the food additive aspartame is affected by market demand, and the transaction price is stable, and the transaction price in export markets is about USD9.3-10/KG, which is expected to continue to maintain stability in the future.
