VITAMIN

01

According to the announcement from the State Intellectual Property Office, Wanhua Chemical Group Co., Ltd. has obtained a project called "Preparation of hot water-insoluble vitamin A acetate microparticles", with the authorization announcement number CN114315675B, and the application date is January 2022

AMINO ACID | Tryptophan

02

Recently, domestic manufacturers' quotations have been weak and stable. At present, factories mainly deliver goods. The current market price is between USD9.5-9.85/KG. The price is at a high level. It is expected that the tryptophan will be stable at near future.

API |

03

Recently, with the announcement of the Ministry of Agriculture and Rural Affairs ' Announcement No. 743, the new veterinary drug approval work has been finalized. As of now, all 8 veterinary drug manufacturers in Binhai District have passed the new version of veterinary drug GMP acceptance by the Ministry of Agriculture and Rural Affairs. These include Shandong Guobang Pharmaceutical Co., Ltd., Weifang Huaying Biotechnology Co., Ltd., Shandong Ark Biotechnology Co., Ltd., etc.

FOOD ADDITIVE

04

Recently, Nestlé has announced that it will withdraw its pea milk product Wunda from the market. The product has been removed from Dutch and international websites, and the brand's dedicated website has also been shut down. It is reported that Nestlé launched the pea milk product Wunda in May 2021, which is one of the first milk substitutes made from yellow peas.
