AMINO ACID

02

Valine: The recent market has been strong. The current market quotation is between USD 1.95-2.08/KG. The external market quotation has been slightly increased, and end users have begun to replenish supplies. We will need to pay attention to the factory's receiving order situation.

API

03

Recently, the Federal Animal Protection applied for "an amoxicillin-clavulanate potassium compound preparation and its preparation method" to the National Patent Office. After strict review by the Patent Office, expert review, joint review by relevant departments and other procedures, it successfully obtained the national knowledge patent. Bureau's authorization.

FOOD ADDITIVE

04

On March 5, sugar substitute manufacturer Baolingbao released an investor activity record for the 2023 annual performance briefing. It showed that the company is facing fierce competition in the industry and declining profit margins. It will expand high gross profits through the construction of new production lines and technological transformation. product production capacity to increase overall profit margins. In addition, the company will gradually shut down and transform low-margin products and eliminate backward production capacity. In terms of market development, Baolingbao said that it will develop new applications and solutions to gain profits through differentiated competition. The company will also optimize the production, supply and marketing system, improve customer service levels, and increase customer satisfaction.
