VITAMIN

01

According to market news, BASF will shut down the production of VA1000 and vitamin E plants in Ludwigshafen, Germany, for regular maintenance, which is planned to start at the end of March and end at the end of May. The market price of vitamin E stopped falling in December and rebounded from a steady jog in January to February. Now the rhythm of small steps and fast running has basically appeared.

AMINO ACID

02

Threonine: The manufacturer's quotation was adjusted to the strong side, and the transaction was good. As prices rise, market purchases and sales are active, and end users just need to restock. It is expected that threonine prices will be stable to strong in the later period.

API

03

Recently, the "Triple Inactivated Vaccine for Newcastle Disease, Avian Influenza, and Avian Adenovirus" jointly developed by Guizhou Foster Biotechnology Co., Ltd., a company in Guiyang High-tech Zone, and several units has won the national new veterinary drug certificate, which also marks the independent research and development of Guizhou Province. A "zero" breakthrough in new veterinary drugs (biological products for veterinary use).

FOOD ADDITIVE

04

Recently, affected by market conditions, the price of L-carnitine BASE from mainstream manufacturers has stabilized to around USD21-22/KG. It is expected to show a stable trend in the future
