VITAMIN

01

VB3: After several months of sideways trading at the bottom, market transactions are currently active, and manufacturers have increased their quotations. Factory delivery is tight and downstream inquiries are increasing. As the supply of low-priced goods in the market gradually decreases, the probability of bullishness increases in the later period.

AMINO ACID

02

Lysine: The recent quotations from manufacturers are relatively strong. The market of 98% lysine has active transaction atmosphere, end-users are signing orders well, and the price is between USD1325-1365/MT. It is expected that the market price will be relatively strong in the short term.

API

03

For neomycin sulfate, market transactions are active, prices fluctuate upward, and manufacturers' deliveries are tight. The market price is relatively strong in the short term and is expected to rise steadily in the later period.

FOOD ADDITIVE

04

Recently, the National Health Commission passed the review of 6 new food raw materials including dendrobium bulbs. During the same period, 12 new food additive varieties and 5 new food-related product varieties passed the review. The six new food ingredients approved this time are dendrobium protocorm, (3R,3'S)-dihydroxy- β -carotene, *Pichia kluyveri*, *Bacillus subtilis* DE111, L- α -glyphosphocholine, *Leuconostoc mesenteroides*; the two new varieties of nutritional fortifiers to focus on are 2'-fucosyllactose and d-ribose.
