VITAMIN

01

Overall changes in the vitamin market last week, VE, VB1, VB2, VK3 and other products turnover steadily upward upward; VA, biotin consumption of low-priced market inventory is dominated by; VD3 factories have stopped reporting; folic acid, VB6, B12, calcium pantothenate and other markets are more stable.

AMINO ACID

02

Last week Lysine factory offer is still running strong, the mainstream first-line factory offer up, the factory delivery is tight, delivery period in May-June, the export price between USD 1300-1330/T, the factory production is stable, the start rate is high, end users to just replenish the main, raw material corn prices slightly stronger, it is expected that in the short term the lysine overall market is running strong.

API

03

Last week, most of the products in the API market are still at low prices, with poor market demand and high competitive pressure. Tylenol, strong, fluorobenzene prices run weakly, the main reason is still affected by demand. Neomycin sulfate, levamisole hydrochloride by the supply, raw materials and other impact on the price is stable, the follow-up has continued to rise possible. Amoxicillin factory discontinued prices remained stable, oxytetracycline, sulfonamide varieties continue to run smoothly.

FOOD ADDITIVE

04

Last week, the food additive plate overall stable operation. Sweetener series products Sucralose / Aspartame / Acesulfame prices stable normal shipments; some Creatine Monohydrate manufacturers scheduling to the middle and bottom of April, the current price of large factories remain stable; preservatives products Sodium Benzoate / Benzoic Acid / Potassium Sorbate and Sorbic Acid prices remain stable. Xanthan gum price of some manufacturers stopped reporting expected subsequent price increases.
