Vitamins to VEGA!

1st. Apr. 2024

VITAMIN

01

Combined with the current market conditions and the impact of raw materials, the quotation of 2% Biotin from Hegno on March 29 is USD4.2/KG.

AMINO ACID

02

This week small varieties of amino acid market stable slightly increased. Soybean meal price increase, which stimulate amino acid market demand and valine factory external quotation is strong. However end users still purchase based on demand procurement. Tryptophan market is relatively weak, trade market price between USD9-USD9.1/KG, market purchase and sales are not active.

Need to pay attention to the factory signing situation.

API

03

This week, the veterinary drug raw materials market remains weak and stable operation, the overall market demand is still relatively weak. Amoxicillin quotation is still stopped, the market supply is tight; Neomycin sulfate and levamisole hydrochloride are affected by supply and raw materials, and their prices are relatively strong, and may continue to rise in the future. Follow up with continuous attention.

FOOD ADDITIVE

04

This week, the food plate as a whole to maintain a stable operation, sweetener series of products sucralose/Acesel honey prices stable and normal shipment/AS8 sweet by raw materials, transportation, production costs and other factors affected by price increases, the domestic market transaction price adjusted to USD10.6/KG, the price adjusted to USD9.9-10.3/KG; Creatine monohydrate mainstream manufacturers normal shipment of some manufacturers to the middle of April, the current factory prices are still stable.
