Vitamins to VEGA!

8th. April. 2024

VITAMIN I

01

This week, the overall vitamin market was stable, and the price of individual varieties was raised. It is reported that the mainstream VB1 manufacturers have not made public offers, but the core customers have signed limited order, the price of Vitamin B1 MONO is more than USD21/KG, and the price of B1 HCL is around USD28-31/KG; Niacin/nicotinamide plant slightly increased prices; VC, VE transaction slowly upward; VK3 supplies remain tight.

AMINO ACID I Methionine

02

According to market news, NHU will plan to carry out 6-7 weeks of annual rotation maintenance for each methionine production line of Shandong Amino Acid plant in the third quarter of 2024, during which the methionine production is expected to be reduced by 50%, and NHU will ensure the normal performance of the signed contract.

API I

03

This week, the veterinary drug raw material market maintained a stable, some varieties price fluctuates at the bottom, the overall market demand was weak, and it was still mainly to purchase according to the demand. The prices of neomycin sulfate and levamisole hydrochloride are rising due to supply and raw materials. The albendazole may also rise ; Doxycycline, Tylosin florfenicol maintain weak and stable, Amoxicillin plant supply is tight, stable in the near future. Continue to pay attention later.

FOOD ADDITIVE I

04

This week, the food plate maintained stable, sweetener series of products sucralose/Acesulmet/aspartame prices and deliver were stable; Some manufacturers of creatine monohydrate deliver schedule to the end of April, and the current price of the big factory is still stable; Preservative products sodium benzoate/Benzoic acid/potassium sorbate price of remained stable, and manufacturers delivered normally. some xanthan gum manufacturers stop quotation and it is expected price increase in the future.
