Vitamins to VEGA!

9th. Apr. 2024

VITAMIN | Vitamin E 50%

01

According to market news, from April 8th, the Chinese mainstream manufacturers stopped VE 50% feed grade quotation and signing, the market began to wait and see. Before this, VE export manufacturers signed the price at USD7.8/KG FOB, then began to stop signing, individual manufacturers said VE signed not less than USD8/KG; Up to now, China's export FOB transaction price is USD7.6-7.8/KG.

AMINO ACID | Threonine

02

At present, the quotation of domestic factories is relatively stable, the overall transaction is general, the end users mainly digest inventory, some wait and see, and sign the single phase to reduce, the export price is between USD1.32-1.34/KG, it is expected that the threonine market is relatively stable in the short term.

API | Prednisolone

03

Xianju Pharmaceutical announced that it recently received the "GMP Investigation Report" issued by the Japanese PMDA, and the company's prednisolone API passed the Japanese PMDA certification.

FOOD ADDITIVE |

04

The first pilot scale production workshop invested and built by H&H Group in China--the Nutrition and Health Food pilot Workshop of H&H Group, was officially completed in Guangzhou Science City. The pilot workshop covers an area of more than 1000 square meters, the workshop is planned with tablet press, strip machine, wet granulator, boiling granulator, coating machine, hard capsule machine and other main equipment, which can not only improve the technical innovation ability of products, but also help to ensure food safety.
