Vitamins to VEGA!

12th. April. 2024

VITAMIN | Vitamin E 50% 01

After the centralized stop of vitamin E, the domestic and international market attention has increased significantly, many customers in Europe and Southeast Asia have sent inquiries, and customers are very concerned about the sudden stop quotation of VE. The global market continues to ferment, and some large or super-large customers at home and abroad have also begun to make inquiries. Up to now, the tentative transaction price of China's export has risen to USD8-8.2/KG.

AMINO ACID | Tryptophan 02

Recently, the domestic tryptophan price market is weak, the trade market price is between USD8.5-8.75/KG, the end user demand is reduced, the overall market order is depressed, it is expected that the tryptophan market is weak in the short term, pay attention to the factory order.

API | Amoxicillin 03

Amoxicillin, currently maintain a medium and high stable operation, the market price USD32-33/KG, the major factories tight production, inventory pressure is small, the market supply and demand is relatively stable balance, the subsequent price is expected to be stable operation.

FOOD ADDITIVE | 04

Recently, the nutritional additive creatine monohydrate mainstream factory has been to May, the Chinese market transaction price is about USD6.88/KG, the current mainstream manufacturer price is still stable, the future price is expected to maintain stable operation in the short term.
