VITAMIN | Vitamin B1

01

Xinfa Pharmaceutical Co., Ltd. plans to invest 5,625,300 yuan in the construction of pharmaceutical grade vitamin industry chain upgrading project in the new factory. In this project uses part of the existing equipment and new equipment in the B1 workshop to rebuild a pharmaceutical grade vitamin production line and supporting facilities, and uses the intermediate thiothiamine in the existing feed grade B1 production line as the main raw material to produce 300 tons/year of pharmaceutical grade vitamin B1. The production bottleneck of the existing feed grade vitamin B1 production line is the production process of the intermediate thiothiamine, so the total production capacity of vitamin B1 in the whole plant will remain unchanged after the completion of this project.
