23th. Apr. 2024

VITAMIN

01

On April 22, NHU announced the suspension plan for the vitamin C production line. It plans to suspend production in early May 2024 for maintenance and renovation of the production line. It is expected to resume normal production in October.

KDW announced that the company's holding subsidiary Jiangsu Chengxin Pharmaceutical Co., Ltd. recently received an invention patent certificate issued by the State Intellectual Property Office. The name of the invention is: a method for the synthesis of L-carnosine catalyzed by biological enzymes.

AMINO ACID

02

It is understood that Xinghu Technology has become one of the top companies in the domestic amino acid industry. As the country implements the soybean meal reduction policy, the application of small varieties of amino acids in feed is on the rise, and the market demand potential is increasing. It plans to invest in building a new 600,000 tons The corn deep processing project will increase the production capacity of small varieties of amino acids, enrich product types, improve product structure, and consolidate the company's industry position.

API

03

Dong-A Pharmaceutical announced on the evening of April 22 that the company's erdosteine API received the API registration certificate from the Korean Food and Drug Administration. At present, there are only a few domestic companies producing erdosteine raw materials, including Yangtze River Pharmaceutical Group and Xian Haixin Pharmaceutical.

FOOD ADDITIVE

04

Recently, a survey by Japanese market research company Intage (Tokyo) found that the functional food supplement market shrank by 7.7% year-on-year after health problems were revealed in Kobayashi Pharmaceutical Company's health products. According to analysis, this is because related products emphasize their efficacy as food and claim to be functional, which has caused widespread dissatisfaction among consumers in the country.
