Vitamins to VEGA!

17th. May. 2024

## VITAMIN

01

Recently, the vitamin B6 market has been stable, and customers mainly purchased for urgent demand. The current market quotation is wide, the export market price is around USD19-20/KG, and we will pay attention to the factory production situation in the future.

## AMINO ACID

02

On May 16th, 2024, the latest quotation of amino acids from Xiangyu Biochemical this week was USD1295/MT for Threonine and USD8550/MT for Tryptophan. Due to the completion of the digestion of valine inventory, the third quarter production plan is to convert Threonine into Valine. . The market demand for amino acids has been relatively weak recently, and coupled with the increase in export sea freight prices, the overall transaction has been average.

## API

03

For doxycycline hydrochloride, mainstream factories have still stopped reporting this week. It is currently during the API exhibition, and the market stock is limited and is in a reluctance to sell. The price is around USD42/KG. As the market heat slowly increases, it is speculated that the subsequent price will slowly rise.

## FOOD ADDITIVE

04

Recently, Sanyuan Bio stated on the investor interactive platform that the company is actively participating in the technological innovation of synthetic biology in the field of functional sugars, focusing on the optimization of existing product lines and the development of new process routes, and continuing to improve technology levels to maintain market competitiveness.
