VITAMIN

01

The VB2 factory raised prices this week, attracting increased market attention; the VC factory released a summer maintenance plan, showing a strong willingness to raise prices; VB1 and VE factories signed limited orders, but traders were reluctant to sell, and the transaction volume moved up; the price of nicotinamide are firm, and the transaction volume increased slightly.

AMINO ACID

02

European Commission launches anti-dumping investigation into lysine imported from China: Local European sources said that the European Commission (EC) launched an anti-dumping investigation into lysine imported from China into the EU after the EU's only lysine producer METEX NOOVISTAGO lodged a complaint. .

API

03

The overall transaction atmosphere of API market has improved this week. The supply of some products at the factory has been reduced, prices have been boosted, market inquiries have increased, and attention has been high, mainly for doxycycline, neomycin sulfate, and tiamulin fumarate. , lincomycin, etc.

FOOD ADDITIVE

04

This week, the prices of sucralose/acesulfame potassium/aspartame, a series of sweetener products in the food supplement segment, have been stable for shipment; mainstream manufacturers of creatine monohydrate are shipping normally, and some manufacturers have scheduled shipments until mid-June. The current prices of major manufacturers remain the same. Maintain stability; prices of preservative products sodium benzoate/benzoic acid/potassium sorbate/sorbic acid remain stable, and all manufacturers deliver goods normally.
