VITAMIN

01

Inositol is currently in the peak season of the aquatic product season. The market demand has improved, and the factory supply is sufficient. In addition, new factories have entered the production capacity. The market competition is relatively fierce, and the price has dropped slightly compared to the previous two months. At present, market prices are mainly stable and are expected to maintain stable operation in the near future.

AMINO ACID

02

Recently, the Xinjiang Meihua annual output of 18,000MT of isoleucine project environmental impact report was released to the public for the first time. An investment of 99.8736 million yuan was used to transform the currently idle glutamic acid workshop eight into an annual output of 18,000MT of isoleucine.

API

03

Recently, the price of lincomycin hydrochloride has increased. It is reported that an accident occurred in the Linke workshop of a factory in the early stage, resulting in Linke's insufficient production and tight supply.

FOOD ADDITIVE

04

Recently, the food additive xanthan gum has been affected by market demand. Mainstream manufacturers have raised prices, and some manufacturers have continued to stop reporting. The current market transaction price is around USD3.7-3.9/KG, and the possibility of subsequent price increases cannot be ruled out.
