Vitamins to VEGA!

17th. June. 2024

VITAMIN

01

Near the Shanghai CPHI conference, the vitamin market attention increased, VB1, VA, VD3, VE still strong operation, strong transaction; Calcium pantothenate and folic acid were slightly weakened. Other vitamins keep stable.

AMINO ACID

02

Recently, Wanlilida Group's latest overhaul plan: Wanlilida Group's three parks annual routine rotation overhaul, while upgrading some production lines, is planned to start in early July, is expected to 20-25 days. Recently, lysine factory has issued more maintenance plans, manufacturers have increased quotations, end users are mainly watching, market inquiries are increasing, and later attention is paid to factory signing and delivery.

API

03

This week, the veterinary drug raw material market as a whole maintained stable operation, most varieties are still in the bottom, the floating space is small, the market negotiated. Some varieties are affected by supply prices are firmer. Near CPHI, doxycycline mainstream factory stopped reporting, the market stock is limited and reluctant to sell; Lincomycin, colistin prices strong; Florfenicol, oxytetracycline and other varieties were mainly stable, and continued attention was paid to them in the later stage.

FOOD ADDITIVE

04

Recently, the food plate sweetener series products deliver smoothly; Creatine monohydrate mainstream manufacturers deliver is normal, some manufacturers' deliver have scheduled to end of June, the current factory price is still stable, thickener products xanthan gum affected by the market, price is stable in the domestic market, delivery is expected at the end of June. Will continue to pay attention to the market situation and the delivery of each manufacturer.
