Vitamins to VEGA!

25th.July. 2024

## VITAMIN | Inositol

01

Inositol, the recent market demand is general, the factory supply is sufficient, in addition, there is a new factory capacity to enter, the market competition is relatively fierce, the price has been slightly reduced compared with before. At present, the mainstream factory price is USD5.5-6.8/KG, the new factory price is slightly lower, and it is expected to maintain stable operation in the near future.

## AMINO ACID | Methionine

02

The quotation of Methionine manufacturers is weak, the transaction is less, and the trade market quotation is USD2.6-2.7/KG. End users mainly consuming of stock, less replenishment. According to customs data, in June imports of Methionine 0.9 million tons, an increase of 6.1% quarter-on-quarter.

## API | Tilmicosin Phosphate

03

Tilmicosin Phosphate, the mainstream factory price increase this week, mainly affected by the early market low, coupled with the recent shortage of upstream raw material intermediates, resulting in tight supply. At present, the market stock inquiry have increased, the market heat has slowly increased.

## FOOD ADDITIVE

04

Recently, the nutrient additive creatine monohydrate mainstream factory delivery normal scheduled to early August, the domestic market transaction price is around USD4.4-4.96/KG, the current mainstream manufacturer prices still remain stable, the future price does not rule out the possibility of slow decline.
