VITAMIN

01

Reuters reported: On the afternoon of July 29, 2024, an explosion occurred at the Ludwigshafen plant of BASF Company, injuring 14 people. According to a spokesperson for German chemical giant BASF and the police, a fire broke out in the south of BASF's plant in Ludwigshafen, which has now been extinguished and the cause of the fire is still under investigation.

It is understood that BASF's Ludwigshafen plant produces feed-grade vitamin A1000 and vitamin E, as well as various human nutrition, animal nutrition and cosmetic ingredients. It is not clear whether the incident will affect these production lines.

AMINO ACID

02

Valine: At present, the manufacturer's quotation is stable, and the market price is at USD 1.75-1.85/KG. The inquiries are average. It is expected that the price of valine will be stable and a bit weak in the short term.

API

03

On the evening of July 28, Sinovac Biotech announced that its albumin-bound paclitaxel for injection (Apexelsin®, referred to as "albumin paclitaxel") has been approved for marketing by EUROPESE COMMISSIE (European Commission). This product was authorized and introduced in April 2021 in cooperation with Zhejiang Haichang Biopharmaceutical Technology Co., Ltd.

FOOD ADDITIVE

04

Recently, Australian startup Nourish Ingredients announced a partnership with Fonterra to accelerate the development of dairy products that produce fat through fermentation. Nourish will work with Fonterra to develop a lipid Creamilux produced by genetically engineered microorganisms, which is said to "reproduce the rich, creamy mouthfeel, taste and emulsifying properties of milk fat." Nourish CEO James Petrie said the partners will also explore opportunities for Nourish Ingredients' fats to enhance non-dairy categories.
