Vitamins to VEGA!

31st. July. 2024

VITAMIN

01

According to market news, domestic vitamin C manufacturers have stopped quoting and offering starting this week, and it is expected that the price will continue to rise steadily.

AMINO ACID

02

Threonine: The mainstream factory quotation has risen to USD 1375-1415/MT. The overall market price has increased significantly. The market has actively inquired about orders, but the spot supply is relatively small. At present, end users sign orders on demand, and some are waiting and watching due to the high price. We will pay attention to the progress of exports and shipments. It is expected that the price of Threonine will remain strong.

API

03

Recently, Zhejiang Jutai Pharmaceutical Co., Ltd., a wholly-owned subsidiary of Propharma, received a marketing approval notice for metoprolol succinate sustained-release tablets issued by the U.S. Food and Drug Administration (FDA). This product is another overseas preparation product of Propharma. The approval of ANDA by the FDA indicates that Propharma is qualified to sell the drug in the U.S. market, which is an important milestone in the international development of the company's preparations.

FOOD ADDITIVE/ Sucralose

04

Affected by market demand, the price of food prebiotic oligofructose is currently stable at USD4.5-4.7/KG in the domestic market. In the short term, the price will not change significantly, and we will continue to pay attention to market changes.
