VITAMIN

01

On August 5, according to market news, two domestic manufacturers increased the price of feed-grade VE by 50% and signed orders in limited quantities.

AMINO ACID

02

Threonine: The mainstream enterprises raised their quotations, and other manufacturers followed suit. The market inquired actively, but the spot supply was relatively scarce. At present, end users place orders on demand, and some are waiting and watching due to the high price. They are paying attention to the factory's export and delivery progress. It is expected that the price of threonine will remain strong.

API

03

Recently, Renmin Pharmaceutical announced that its holding subsidiary Yichang Renmin Pharmaceutical passed the UK GMP compliance inspection. The production line has an annual design capacity of 500 million small-volume injections. Its main products include fentanyl citrate injection and sufentanil citrate injection.

FOOD ADDITIVE

04

Recently, the food additive aspartame has been affected by market demand, and the market transaction price is around USD9.5-10/KG. It is expected that the price will remain stable in the future.
