VITAMIN

01

It is understood that in March of this year, the "Zhejiang NHU's annual production of 400 tons of biotin (an additional 200 tons), 298 tons of hexamethyldisiloxane (an additional 89 tons), and 2,500 tons/year of sodium acetate solution (an additional 2,500 tons)" was reviewed in accordance with the acceptance conditions and was approved for filing.

AMINO ACID

02

Tryptophan: At present, the manufacturer's order signing is average, the price is running weak and stable, and the actual transaction is negotiable. The terminal is mainly replenishing stocks due to rigid demand, the user's order signing sentiment is weak. It is expected that the price of tryptophan will be stable with a slight adjustment in the short term.

API

03

The environmental impact assessment document of Huangshi Fuertai Pharmaceutical Technology Co., Ltd.'s API Technology Transformation Project 2 (re-approval) was published on relevant websites. The total investment of the project is 60 million yuan, involving 13 API products including dequalinamide, tenofovir alafenamide fumarate (TAF), iron protein succinate, clenbuterol hydrochloride, brivudine, potassium sulfate, diprophylline, furosemide, penethylidine hydrochloride, pralidoxime chloride, sodium thiosulfate, isavuconazole sulfate, and bepedic acid, with a total production capacity of 150.15 tons/year.

FOOD ADDITIVE

04

Recently, Cargill opened its first premixing plant in Pandan, East Java, Indonesia. According to Cargill's 24-year research, 40% of consumers in the Asia-Pacific region prioritize texture when choosing food and beverages, and show a preference for diversity in candy products, such as hard candy/soft candy/carbonated candy. Cargill said: "Indonesia is one of the key markets. The new advanced mixing facility enables Cargill to develop specialty product solutions that combine modified starches, sweeteners, pectin and carrageenan to help Asian consumers create exciting candies with different textures."
