VITAMIN

01

Xiamen KDW.'s holding subsidiary Jiangsu Chengxin Pharmaceutical Co., Ltd. and its wholly-owned subsidiary KDW Biotechnology Co., Ltd. recently received 1 invention patent certificate issued by the State Intellectual Property Office. The details are as follows: Invention name: A method for preparing an L-carnosine zinc complex. The present invention provides a method for preparing an L-carnosine zinc complex. In the complexation reaction stage, the preparation method does not require the addition of water, that is, the use of an anhydrous solvent system reduces the difficulty of product purification, and after solid-liquid separation, the amount of residual solvent in the wet product is small, which reduces the difficulty of subsequent granulation, and has a high application value for the industrial production of L-carnosine zinc complex.

AMINO ACID

02

SEWON brand 50% L-tryptophan sold by Daxiang (Beijing) Food Co., Ltd. has been fully launched on the market: 50% L-tryptophan adopts the world's top biological fermentation technology of Daxiang Co., Ltd. of South Korea. The target product is produced in China and sold exclusively by Daxiang (Beijing) Food Co., Ltd. The company can sell 30,000 tons of L-tryptophan products (20,000 tons of 50% L-tryptophan and 10,000 tons of 98% L-tryptophan) annually, which can stably supply the domestic and global markets.

API

03

Fuan Pharmaceutical announced that its wholly-owned subsidiary, Chongqing Bosheng Pharmaceutical Co., Ltd. of Fuan Pharmaceutical Group, recently received the API registration certificate from the Korea Food and Drug Administration (MFDS). Nicergoline is suitable for acute or chronic cerebrovascular disorders or poor brain metabolism. Chronic brain dysfunction causes inconvenience in movement and language disorders, tinnitus, dizziness, visual impairment, sensory impairment, headache, insomnia, memory loss, lack of concentration, depression, anxiety, and agitation.

FOOD ADDITIVE

04

Today, the food additive sodium saccharin dihydrate is affected by market demand, and the market transaction price is around USD4.5-5/KG. In the short term, the price of anhydrous sodium saccharin will stabilize.
