01

On November 25, Jiangxi Haiwen Biotechnology and Guangzhou Datang Cosmetics established a joint laboratory for niacinamide efficacy innovation. The establishment of this laboratory deepened the cooperation between the two parties in the field of cosmetic-grade niacinamide and built a platform for seizing the development opportunities of the national trend of functional cosmetic raw materials industry. Haiwen Biotechnology relies on its own product chain and technology innovation chain, combined with the research and development, production and other capabilities of Datang Cosmetics, focusing on the innovative application of niacinamide in the field of skin care. In the future, the laboratory will focus on consumer needs, increase R&D investment, and launch more efficient and safe niacinamide skin care products.

AMINO ACID

02

From January to October 2024, the cumulative export of threonine increased by 130,000 tons year-on-year, and the domestic manufacturers' quotations remained strong. According to China Customs import and export data, from January to October 2024, the cumulative export of threonine was 592,000 tons, a year-on-year increase of 131,000 tons and 28.5%. The current price of threonine is at a relatively high level. Users are cautious about replenishing stocks and purchase on demand. Follow-up, we will pay attention to the factory's order progress.
