Vitamins to VEGA!

4th. December. 2024

## VITAMIN

01

Recently, affected by the rebound of the raw material niacinamide market, vitamin K3 stopped falling and stabilized. Previously, the MSB market price of vitamin K3 fell from USD15.5/KG to USD11.6/KG. The current market is running smoothly, and customers mainly buy and use it immediately.

## AMINO ACID

02

Huaheng Bio's feed-grade valine price: starting from 2010USD per ton from now on, limited order signing; feed-grade tryptophan starting from 6990USD per ton; feed-grade arginine starting from 3365USD per ton; feed-grade calcium pantothenate starting from 7115USD per ton.

## API

03

Recently, Beijing Municipal Bureau of Economy and Information Technology, Beijing Economic and Technological Development Zone Management Committee (Beijing Economic and Technological Development Zone) and Sanofi formally signed a memorandum of cooperation. Sanofi will invest about 1 billion euros to build a new insulin production base in Yizhuang, Beijing, to enhance the local end-to-end production and manufacturing capabilities of insulin, and focus on serving the insulin medication needs of local diabetic patients. This will be Sanofi's fourth production and supply base in China, and it has created the company's largest single investment record in China.

## FOOD ADDITIVE

04

The price of calcium propionate, a preservative product, remains stable, and delivery is tight for mainstream manufacturers. The transaction price of calcium propionate in the overseas market is around US\$1.3/ KG. It is expected that the price of calcium propionate will not change much in the short term.
